

To our BostonSight SCLERAL network,

Just like you, health and safety is always our priority. In response to the COVID-19 pandemic, BostonSight is limiting patient care at our Needham, MA clinic by rescheduling routine annual comprehensive appointments, evaluating all patients who are scheduled for medical evaluations, consults and treatments for urgent/emergent care; and limiting patient interaction in common areas to maintain social distance. Employees who can work remotely will do so.

Our manufacturing lab has been disinfected and we have limited access to only essential personnel as well as limited interaction between lab staff and other staff members. Our manufacturing lab continues to operate and will ship products as ordered. Lab protocols for device servicing will follow recommended ISO disinfection protocol. We recognize your regular patient schedule may also be affected. If you have concerns regarding specific patients falling outside of the 90-day fitting period, please contact us and we will extend to accommodate.

If you have questions, please contact us at 1-888-SCLERAL or bostonsightscleralteam@bostonsight.org.

We will continue to monitor the situation and implement recommendations and update protocols based on data and recommendations from authoritative sources. For the most up-to-date information please see <https://www.cdc.gov/coronavirus/2019-ncov/index.html>.

Thank you,
Sara Yost
President and CEO
