CASE STUDY

USING SCLERALIG TO OPTIMIZE COMFORT, VISUAL CLARITY, AND EFFICIENCY

BACKGROUND

Patient is a 44-year-old male paralegal who requires good vision in fast-paced legal office. BVA w/spectacles 20/70.

SCLERAL LENS FITTINGS

Patient previously wore 17.0 mm sclerals with poor comfort, mid-day fogging, and vision issues. We refit left eye with SCLERALIG 18.5 mm using ESP profilometry and FitConnect®.

Eaglet's DirectConnect software integration with FitConnect allows the image to go straight to the BostonSight manufacturing lab.

RESULTS

Success with first lens!

Patient was very happy and stated this is the "best lens ever." He wanted to refit the right eye to this larger, better lens design.

Eaglet's DirectConnect software integration with FitConnect allows the image to go straight to the BostonSight manufacturing lab.

Updated 2022: SCLERALIG preceded BostonSight SCLERAL Smart360®, which is the current, updated free-form design feature available.

SUCCESS WITH FIRST LENS!
